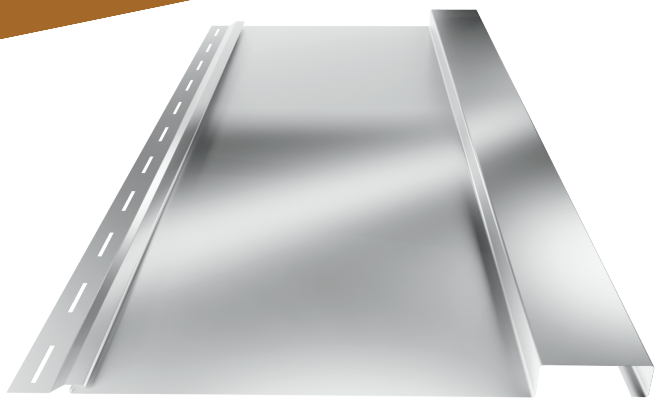
Board & Batten



The Board & Batten panel is a high end steel siding profile. It's hidden fastener system provides a highly desired aesthetic appeal. Board & Batten is available in 24 and 26 gauge material in any of our stock SMP colours as well as our stock woodgrain and textured material.

With a 3/4" high batten the panel also features a convenient nailing flange for easy installation with no clip system required. Board & Batten is available as a flat panel or to avoid the risk of oil canning, Board & Batten can also be run with a striation pattern.

This panel is used as a siding profile and can be installed vertically or horizontally.
